DESIGNED TO MEET THE SPECIFIC NEEDS OF HOSPITAL INTENSIVE AND CARDIAC CARE UNITS (ICU/CCU).

- Broad glass panels provide unobstructed view to patients.
- Patients remain undisturbed by nearby activity, noise or other intrusions.
- The 7000 Series combines the features of both swinging and sliding doors for easy, flexible access to the patient area.
- The 7200 Series allows for a trackless threshold feature with the ability to breakout the SX panel at any point.
- The 7500 Telescopic Series creates a greater clear door opening and is also available in a trackless version.

Stanley Automatic Door Systems - the safest, most cost effective solutions available today.

FEATURES & BENEFITS

DOOR PACKAGES ARE CUSTOM MANUFACTURED TO FIT YOUR JOB REQUIREMENTS
HEADER SIZE: 4" (102mm) high x 4-1/2" (114mm)
TYPICAL HEIGHT: 7'-4" (2.2m), clear door opening of 6'-10 1/2" (2.1m)
TYPICAL WIDTH: 2 Panel: 7' (2.1m) to 9' (2.7m),
clear door opening width of 35-1/2" (901mm) to 47-1/2" (1206mm)
3 Panel: 10-1/2' (3.2m) to 13-1/2' (4.1m),
clear door opening width of 35-1/2" (901mm) to 47-1/2" (1206mm)
4 Panel: 10' (3m) to 14' (4.2m),
clear door opening width of 48" (1219mm) to 72" (1828mm)

HEADER PROFILES

7000 SERIES DOORS:
• Provide maximum patient-area visibility even when doors are closed.
• Allow flexible access to patient area through single-panel opening or by stacking all panels to one side.
• Guard patients from unwanted noise or other intrusions
• Features a track or trackless-threshold, consult with Stanley Representative.

7200 SERIES DOORS:
• Advantages of 7000 Series without need for threshold.

7500 SERIES DOORS:
• Telescopic version.
• Largest clear opening width.

7500 ICU FBO:
• Full Breakout Opening.

HARDWARE & CONTROLS
• Manual Panic Hardware • Electrified Panic Hardware • Electromagnetic Locking • Sentrex Matteless Safety System • Push Plates & Kick Plates • Motion Sensors • Pull Cords • Card Readers

SENTREX RETROFIT
Stanley's Sentrex Swing Door Safety Sensors are retrofittable to hollow metal and wood fire doors.

UL FIRE RATING
Magic-Access, Magic-Force and Magic-Swing are UL-certified for use as Fire Door Operators on single-swing (or pairs of) fire-rated doors (wood core, hollow metal and steel covered composite type door assemblies) in the U.S. & Canada. Single swing doors must be equipped with electric strikes. Pairs of doors must be equipped with a fire rated exit device(s) of type used with remotely activated retractable latch bolts.

SECURITY OPTIONS
• Stan-Vision™ Digital Surveillance Camera provides safety and motion detection in one sensor as well as security surveillance.
• Jamb Cameras provide added surveillance with identification/profile view or surveillance/wide angle view.

SERVICE
Stanley Access Technologies is your best choice for planned maintenance packages. We have North America's largest and best-trained network of service technicians who not only have the technical expertise and resources to maintain and quickly service our products, but other brands as well. Available 24 hours a day.

FOR CUSTOMER CARE, CALL TOLL FREE 1-800-7-ACCESS (1-800-722-2377)

Stanley Access Technologies designs, manufactures and markets automatic door systems worldwide. For more than 70 years, we've set the global standard for smooth, quiet operation, user safety, design flexibility, quality, reliability and ease of installation.

Few businesses require as diverse and broad a range of dependable automatic and manual door systems and operators as do hospitals and healthcare facilities. Stanley is the one company with the range of access technologies and door systems to meet virtually every hospital or healthcare facility doorway need.

Whether to accommodate heavy pedestrian traffic or to provide smooth, safe, unobstructed passage for wheelchairs or mobile beds, Stanley has the right automatic or manual door system to meet any access need—from main entrances to emergency room doors to the entryways for radiation and refrigeration areas, intensive and cardiac care units (ICU/CCU) operating suites, and every passageway in between. Many of these systems, which include sliding, swinging and revolving doors, may be customized with access control/security systems.

**ICU/CCU 7000 SERIES**

Stanley’s 7000 Series track and trackless manual door systems are designed to meet the specific needs of hospital ICUs and CCUs. Their broad glass panels provide an unobstructed view to patients, while leaving patients undisturbed by intrusions. Available in 2-, 3- and 4-panel 7000 packages, as well as 3- and 6-panel 7000 telescoping packages. The 7000 Series combines the features of both swinging and sliding doors for easy access to the patient area: open a single panel for ingress or egress; or stack the panels to either sides to provide the widest possible opening to move patients and beds, bulky equipment or delicate materials. The 700 Ti Series doors including the 7000 Telescoping are trackless and allow all panels to break out when fully opened.

**ICU/CCU 7200 SERIES**

Our 7200 Series door system combines the trackless threshold feature and all the other benefits of our 7000 Series ICU/CCU system with the ability to break-out the doors anywhere along the sliding door motion. Available in two- or four-panel packages. Whether for emergencies or routine procedures, the 7200 Series ensures the ability to move beds and bulky equipment safely and easily in or out of an ICU/CCU area.

**ACCESSIBILITY**

The Magic-Access™ system provides the advantages of an automatic operator in a more compact unit ideal for hospital use. The patented Magic-Touch™ feature activates with a light touch push, and complies with ANSI standard A156.19 for “low-energy” door operation. The door opens under power and uses a spring mechanism to close. The Magic-Access system offers a highly reliable and economical way to retrofit existing doors to comply with public access laws.

For heavy-duty applications the Magic-Force™ system provides a solution that combines the robustness of a “full-energy” operator with the smooth, quiet control of a “low-energy” system. Magic Force™ research has resulted in a adjustable spring for changing environmental conditions. This product is ideal for use on exterior door applications with high wind or other abusive conditions.

**FIRE DOORS**

Stanley offers a range of automatic fire door operators built to comply with local, state and national fire codes. They are designed to interface with most electric strikes and electric latch retraction devices. In the event of a fire or other emergency, the operators will shut off automatically, allowing egress to doors and latch. The automatic fire door operators will continue to function manually with the use of the exit device hardware.

These operators may be installed on all approved fire doors, including wood and hollow metal. The fire door operators may be fitted to any of doors swinging in the same direction or in a pair of doors swinging in opposite directions, as well as a pair of doors swinging in or out.

**DOOR TYPES:**

- Hollow metal or wood glass and aluminum lead lined up to 5,000 pounds
